1- INTRODUCTION

1-1 OBJECTIVE

Normally sulfide copper concentrate in smelter plants produce SO₂ Gas and this gas will go to Sulphuric Acid in order to reduce the environmental impacts. In this regard, in order to control SO₂ pollution caused by copper smelter plants in Sarcheshmeh and Khatoon-Abad complexes in Kerman, National Iranian Copper Industries company (NICICO) which is one of the largest copper producers in Iran, has scheduled two major projects of acid plants establishment for converting SO₂ to Sulphuric Acid, also has been expanding the old plant of Sarcheshmeh complex. Estimation shows that the production capacity of sulfuric acid could be increased from 100,000 tons to 1,500,000 tons using output gases from smelting plants in Sarcheshmeh and Khatoon-Abad Copper complexes. Approximately 900,000 t/y of sulfuric acid will be produced from Sarcheshmeh and around 600,000 from the Khatoon Abad Copper Smelting Complex located 40 km far from Khatoon-Abad City.

Studies indicate that only industries producing Phosphoric Acid and Chemical Fertilizers (such as phosphate, nitrate, potash and metallic sulphate fertilizers) are able to economically produce this production among downstream industries of Sulfuric Acid. National Iranian Copper Industries Company (NICICO) intends to build a plant with the goal of consumption of excessive produced Sulphuric Acid in order to converting 900,000 tones Sulphuric Acid into valuable fertilizers.

1-2 DEFINITIONS

The following words and expressions shall in this document have the meanings

National Iranian Copper Industries Company (NICICO)

Project Name: NICICO Chemical Fertilizer Complex
Doc. Name: Pre-Qualification Document for EPCF Type Project

12th March

Page 5 of 40

assigned to them herein unless otherwise is required by the text:

"CLIENT", means National Iranian Copper Industries Company (NICICO);

"Applicant", means a company, a joint venture or a consortium which declares in writing its willingness to participate in performance of the Project and applies to receive this prequalification document;

"Joint Venture / Consortium", means a group composed of two or more companies, Iranian or non-Iranian, which will jointly participate in the project without incorporation of a new legal entity. In case that a joint venture or consortium is qualified by company, or in case that a Joint Venture or Consortium is finally selected as the winning bidder, the members of such joint venture or consortium shall hold joint and several responsibilities against the company in any and all respect;

"Bidder", means a company, a joint venture or a consortium whose qualified to participate in tender is ascertained by the company.

"Project", means the project of NICICO Chemical Fertilizer Complex;

"Reference to Similar Industrial Projects", means performance of projects, inside or outside of Iran, which are similar to the Project in terms of type, nature and process and the Applicant and/or his foreign partner has, wholly or partially, contributed in the execution of such projects;

"Reference to Other Industrial Projects", means performance of industrial projects, in Global, which are similar to the Project in terms of the value of cost and the Applicant has wholly contributed in the performance of such projects.

2- PROJECT PARTICULARS

2-1 SUMMARY OF SCOPE OF WORK

National Iranian Copper Industries Company (NICICO)

Project Name: NICICO Chemical Fertilizer Complex
Doc. Name: Pre-Qualification Document for EPCF Type Project

12th March
2018

Rev: 03

Page 6 of 40

The scope of work consists of project Finance, Engineering, supply of equipment and material, Soil works, civil /structure/ Architectural construction, complete erection of Plant commissioning, plants performance tests, training and providing license and technical Know How, and then Management of Operating of Complex in one year as well as Providing Phosphate Rock for Complex as main Raw-Material.

Further information will be handed over to qualified Tenderer on Tender document in the next stage.

2-2 PROJECT DESCRIPTION

The off gas from copper smelters in Sarcheshmeh which contains high amount of SO₂ gas, metallic and non-metallic components will be used as the feed gas for Sulphuric Acid Plant instead of disposing it to the atmosphere; this process treats the pollutant components and separates solids particles from the gas and produces concentrated Sulphuric Acid with the capacity of 900,000 TPY. The production of Sulphuric Acid is needed to be used in a specific industry and it is not possible to be stored. Producing chemical fertilizers are considered as the most vital and human industry with a lot of consumption of Sulphuric Acid. The Client of project wants to produce some types of Chemical Fertilizers (Fig1). The effluent from all units of plant are collected and sent to effluent treatment unit to remove or recycle of various components according to global environmental health and safety standards. On the other hand, in this factory there is a main waste that is called Phosphogypsum. Phosphogypsum (PG) is a by-product (or waste) generated from the phosphorus fertilizer industry (phosphoric acid production). PG is similar to natural gypsum, but there are

National Iranian Copper Industries Company (NICICO)

Project Name: NICICO Chemical Fertilizer Complex
Doc. Name: Pre-Qualification Document for EPCF Type Project

12th March
2018

Rev: 03

Page 7 of 40

some differences, of which it contains some impurities such as water-soluble phosphate (P_2O_5), water-soluble fluoride (F^-) and P_2O_5 substituted in the gypsum crystal lattice. PG and gypsum are both calcium sulfate dihydrate. The name of PG is used to label the by-product of wet-process phosphoric acid production, whilst gypsum denotes to the natural mineral.

PG management is one of the most serious problems currently faced by the phosphate industry. The storage of PG without any prior treatment requires large land areas and can cause serious environmental contamination of soils, water and the atmosphere. Because of this problem, in this project, the water will be sprinkled on a Phosphogypsum dump to control dust.

IMPORTANT NOTE: According to this explanation one of the main conditions for Applicant to participate in this TENDER is “ **Solution for PG** ”, if Applicant don't have any solution to produce any valuable products or any safe disposal methods, then applicant is not qualified for further assessment and will be reject, because the main Goal of NICICO (Client) is protection of environment.

PRODUCTS NAME	INCLUDE OF
Granulated Single Super Phosphate	0-18-0 (NPK)
Granulated Triple Super Phosphate	0-46-0 (NPK)

3- ESTIMATION OF THE PROJECT'S DURATION

The Project's duration is estimated to be 36 months. The definite duration will be subsequently included in tender documents.

4- PROJECT LOCATION

This place has an area of 200 hectares (1250×1600) located in 8.5 kilometers northwest of Sarcheshmeh Copper Complex, 55 km of Rafsanjan – Shahr e babak

National Iranian Copper Industries Company (NICICO)

road (No. 82) of Kerman province in Islamic Republic Of Iran.

5- PROJECT FINANCING

Financing is part of the project's scope. So applicants must have the capability and permission of Financing of this project based on current international roles and regulation. The related guarantees would be presented by NICICO.

If any applicant don't have capability for this service, in the Pre-Qualification procedure of this tender will be deleted.

6- JOINT VENTURES / CONSORTIUMS

Those Applicants who apply for the pre-qualification documents in the form of a Joint Venture or a Consortium must comply with the following requirements:

6-1 Such Applicants should duly submit the pertinent agreement, together with all other relevant documents, between the members of the Joint Venture or Consortium which is concluded on common industrial and international terms and conditions applicable for this type of agreements and which covers all terms dealing with the parties' cooperation and collaboration to realize the Project (including but not limited to the parties' obligations, the responsibility split scheme between the parties, appointment of the leader, etc.) and which should be valid and in full force and effect at least until one year after the completion of the Project (See item 3 above).

6-2 The provisions of the Joint Venture / Consortium agreement with respect to responsibility split shall be only valid and applicable between the members of the Joint Venture / Consortium and, notwithstanding any stipulation included in such agreements, the members of a Joint Venture / Consortium shall be deemed and

treated to hold joint and several liabilities against the client in any and all respect (in terms of participating in the tender and execution of the Project).

6-3 Any and all forms enclosed to this prequalification document and required information must be completed and presented by each member of a Joint Venture / Consortium individually.

6-4 The Applicants which will be prequalified in the form of a Joint Venture / Consortium may only participate in Project (for pre-qualification or tender) only through one Joint Venture / Consortium and will not be entitled to apply for pre-qualification or participate in the tender through other Joint Venture (s) / Consortium (s).

6-5 The Applicants which will be pre-qualified in the form of a Joint Venture / Consortium may, in case of being qualified by the company, participate in the tender only in the form of the qualified Joint Venture / Consortium and will not be entitled to participate in the tender individually.

6-6-The applicants shall submit a preliminary export license approval for relevant foreign equipment in EPCF (EPC+F) tender stage, otherwise even with acceptance in pre-qualification stage, the submitted documents (for participating in main EPCF (EPC+F) tender) will not be accepted and rejected to the applicant.

6-7 Applicants shall submit consortium agreement and split of work for full of project.

7- EVALUATION CRITERIA

All general conditions are announced in invitation letter and all condition must be passed in order to progress to the Stage 2 evaluation. Final assessment and score evaluation will be done based on following items:

7 -1 Evaluation criteria include:

- a). General Information (Form No.1-1 & 1-2 & 1-3, Section III)
- b). Applicant's particular capabilities (Forms No. 2-1 & 2-2 & 2-3, Section III)
- c). Organization Chart and Personnel (Forms No. 3-1 & 3-2, Section III)
- d). Resources and Facilities (Forms No. 4-1 & 4-2 & 4-3, Section III)
- e). Applicant's Financial Status (Forms No. 5-1& 5-2& 5-3& 5-4, Section III)
- f). Procedure and Technical Standards (Form No.6, Section III)
- g). Litigation History (Form No.7, Section III)
- h). Utilization of Iranian Content (Submission of Summary Report and Analysis)
- i). QA/QC and HSE Systems (submission of evidence is necessary)
- j). Project Management, Planning and Control System (submission of evidence is necessary)
- k). Certificates, Permissions, Approvals and Ranking Certificates issued by competent authorities (submission of evidence is necessary)

NOTE 1: In addition to the above list, Applicant may submit any other useful information, at its option, which illustrates and proves the Applicant's capability and ability.

NOTE 2: Applicants shall submit the forms that mentioned for each consortium separately.

7-2 EVALUATION:

Applications received will be evaluated accordance with the Table of Evaluation

National Iranian Copper Industries Company (NICICO)

Project Name: NICICO Chemical Fertilizer Complex
Doc. Name: Pre-Qualification Document for EPCF Type Project

Criteria (Section IV).

8- QUESTIONS & REQUESTS FOR CLARIFICATION

8-1 Any question or clarification request must be raised in writing to the Contracts Affairs of the Client.

8-2 Such requests must reach the client not later than 10 days before the Closing Date (as defined under item 9-8 below). Any question or request for clarifications received after this date may be declined at client's option.

8-3 The requests should be delivered at the address mentioned in item 9-7 hereof.

8-4 If required, the questions/ clarification requests will be notified to all Applicants through a Circular Letter.

9- PREPARATION AND SUBMISSION OF DOCUMENTS

9-1 Applicants must completely fill in all the attached forms without any changes in the content of the forms. The information required must be typed in, and the forms, along with supporting documents, must be submitted in a clean manner without any addition or omission.

9-2 The following requisites are necessary in preparation and submission of the documents:

A) Applicant will not have the right to assign or pass the prequalification documents to third parties and any such documents submitted by third parties (other than the Applicant) will be rejected by the client;

B). If Applicant acts as a branch, a representative, a representative office or under any other similar title, the Applicant must state the name and particulars of the principal company which the Applicant acts on its behalf and must further determine which section or branch of the principal company will participate in the

tender. Representatives should determine the territory in which they act and if they act on exclusive or non-exclusive basis.

9-3 Information and documents requested under this prequalification document must be prepared and submitted in Farsi or English language.

9-4 The Applicant's documents must include:

- Request Letter;
- The present prequalification document (including four sections) uncompleted;
- Forms under Section (III) of this pre-qualification document as completed together with all required documents and evidence;
- Evidence under sub-items (h), (I), G) and (k) of item 7-1 hereof;
- Consortium agreement and split of work;
- Other Information which may affect the Applicant's evaluation.

9-5 Applicants must state in writing, concurrently with submission of the above mentioned documents, their last legal status for participating in prequalification and contemplated tender (if they will participate individually or through a Joint Venture / Consortium with the name of their partners in case of nomination of a Joint Venture / Consortium).

9-6 Any deficiency in documents and/or information necessary for evaluation, not receiving by the client of Applicant's question or request for clarification within the time limit set under item 8-2 above, non-submission by the applicant of the needed evidence, or non-submission by the Applicant of such additional information or evidence required by the client to ascertain the correctness of the documents presented by the Applicant may result in rejecting the pre-qualification request.

9-7 Applicant's documents (completed forms and associated documents/evidences) must be signed by authorized signatory (ies) of the company or Joint Venture or

10- ANNOUNCEMENT OF EVALUATION RESULTS AND INVITATION TO TENDER

10-1 The final decision of client with respect to the application of each Applicant will be announced by client through fax (facsimile), email or official letter without giving any reason as about the decision taken. The evaluation of the applications received will be conducted solely by the client and any result thereof announced will be final and the Applicant will not have the right to make any claim in this respect.

10-2 Only those Applicants which are qualified by client will be, at the discretion and decision of the client, invited to the tender.

11- CONFIDENTIALITY OF DOCUMENTS

All requests, information and documents received from Applicants will be considered and treated as being confidential and the client will use the same only for the purpose of evaluation and qualification of the company. None of the documents or evidence received will be returned back to the Applicants.

Dear Mr.

Subject: Submission of Prequalification Documents

NICICO chemical fertilizer complex

Reference hereby is made to the "Call for Identification of Contractors" published on the part of that esteemed company in dated. .

Pursuant to the letter No datedthis company whereby we have declared our willingness and readiness to participate in the tender for NICICO chemical fertilizer complex, this serves to submit the prequalification documents duly filled in and completed by this company in accordance with the terms and instructions included in the Prequalification Document issued by client together with all documents and evidence referred to under item 9-4 of the said Prequalification Documents.

In addition, we would like to unconditionally declare that:

1- We submit our request for prequalification individually / through joint venture with / through a consortium composed of and we are bound to comply with all terms included under item 6 of the Prequalification Document in

Form 6- Procedure and Technical Standards:

Please specify the technical standards to be employed in design and manufacturing of the phosphoric acid and fertilizer plant.

Description	Standard or Procedure Name
Quality assurance	
Project management	
ISO	
Health, Safety and Environment (HSE)	
Civil and Structure	
Mechanical	
Electrical	
Piping	
Control and Instrumentation	
Cabling	
Welding	
Painting	

Minimum Required Evidence:

Certificate issued by competent certifying authorities, where applicable shall be submitted.

Table of Evaluation Criteria

Item	Description	Total Score
1- Technical Capabilities – Reference to similar Projects in the last 10 years		240
1-1	Engineering, procurement, installation, construction, commissioning	60
conditions	Project Number: ≥ 6	60
	Otherwise each Project equals 10 points	
1-2	Similar Technology/ Patents /License related to specified Product List	60
conditions	License & Patents ≥ 4	60
	Otherwise each Items equals 15 points	
1-3	Patent/Technology/License/Solution for Phosphogypsum Treatment to produce Valuable Products	60
conditions	Products ≥ 4	60
	Otherwise each product equals 15 point	
1-4	Patent/Technology/License/Solution for Producing Other Valuable product from the Process	60
conditions	Product ≥ 4	60
	Otherwise each product equals 15 point	
2- Technical Capabilities – Reference to Other Industrial Projects in the last 10 years		60
2-1	EPC Projects in Iran	40
conditions	Project Number: ≥ 5	40
	Otherwise each Project equals 8 points	
2-2	EPC Projects in other countries	20
conditions	Project Number: ≥ 5	20
	Otherwise each Project equals 4 points	
3- Financial Capability		300
3-1	Registered Capital	30
conditions	≥ 500 million Euro	30
	Otherwise	10
3-2	In Iran : Effective accumulated financing amount for the last five years	80
conditions	≥ 600 million Euro	80
	≥ 300 million Euro, <600 million Euro	40
	<300 million Euro	20
3-3	In Other Countries : Effective accumulated financing amount in recent 5 years	40
conditions	≥ 600 million Euro	40
	≥ 300 million Euro, <600 million Euro	20

	<300 million Euro	10
3-4	In Iran : Average Turnover in recent 5 years	80
conditions	≥60 million Euro	80
	≥30 million Euro,<60 million Euro	40
	<30 million Euro	10
3-5	In Other Countries : Average Turnover in recent 5 years	70
conditions	≥600 million Euro	70
	≥300 million Euro,<600 million Euro	30
	<300 million Euro	10
4- Phosphate Rock Providing in during the complex running time		150
4-1	Providing suitable phosphate rock as raw material in each year of complex running time (30 years)	30x5
5- Project Management, Planning and Control system		40
5-1	Enjoying HSE And QA / QC System	15
5-2	Enjoying ISO Standard & system and Procedure	5
5-3	Enjoying Project Management Standard	5
5-4	Project Management, Planning & Control System Software	10
6- Resources (Human Resources, Machinery, Office and Vendor)		30
6-1	Construction Machinery	10
6-2	Branch Offices, Subsidiaries in Iran	10
6-3	Organization Structure / Chart and personnel	10
7- General Evolution		30
7-1	Presentation quality	10
7-2	Certificates, permissions, Authorization and Ranking Certificates	10
7-3	Good performance Certificates from other Clients	10
8- Operating & Maintenance of Fertilizer complex		150
8-1	Operation & Maintenance in Similar Fertilizer Plants	150
conditions	Plant Number: ≥4	150
	Otherwise each Plant equals 40 points	
TOTAL POINTS		1000

Remark:

1. It shall be noticed that at least one member of the JV/ Consortium shall satisfy each requirements, and then the Joint Venture/ Consortium can score.
2. The grand total will be the aggregate of all total score obtains for the criteria determined in the above table.
3. Applicant with a grand total of more than 750 will be qualified for the tender.
